

BLS for HCPs and Ancillary / Support Staff (CPD)

Be Prepared

Health Care Professionals are required to undertake annual revalidation in Basic Life Support, in addition to many ancillary and support staff providing health care services.

The Level 2 Award in Basic Life Support and the Safe Use of an Automated External Defibrillator qualification, has been designed to provide candidates with the skills needed to administer safe, prompt and effective basic life support and to use an AED safely in emergency situations.

We are also able to provide training packages which include the purchase of an AED, cabinet for external storage and accreditation with the Statutory Ambulance Service.

So why not consider making your AED available for public access, and support one local community with your resources.

Contact us for more details

What's Covered
