Helping to save more than lives

Aquatic Therapy Shallow Pool Rescue Award (ATSPRA)
Emergency Pool Response (EPR)

Be Prepared

1 and 2 Day Courses

RLSSS Regulated

Certificate 2 Years

ATSPRA is a supervision and rescue qualification for therapists, teachers and support staff working on the poolside or in the water during activities such as aquatic therapy or therapeutic exercise/play. The qualification is suitable for use in shallow pools where the rescuer will not be required to swim to perform a rescue, with water no deeper than the rescuer's chest depth.

The Emergency Response Pool Programme (ER-Pool) is designed to assist designated staff to respond to an emergency within the swimming pool environment when the alarm has been raised. The Emergency Responder can be any member of the facility called upon to rescue and provide first aid.

ER-Pool is also a suitable qualification to back up and support the lifeguard team.
In addition, this qualification is an excellent foundation for becoming a lifeguard and completing the RLSS UK National Pool Lifeguard Qualification.

The ER-Pool programme is designed for use in small pools no greater than 1.5m in depth - such as a health club or hotel pool.

For pools that require direct supervision on poolside or for larger pools, the RLSS UK National Pool Lifeguard Qualification would be more suitable.

What's Covered

- Aquatic Therapy Shallow Pool Rescue Award (ATSPRA)
- Emergency Response Poll (ER Pool)
